

Invitation to the 21st Security Talk

«Drones – Gamechanger in the Military and Civilian Sector»

Dear members, interested parties and guests,

Drone technology has rapidly evolved in recent years and drones are now indispensable in both the military and civilian sectors. They enhance modern armed forces' reconnaissance and operational capabilities, increase security through precise surveillance, and open up new possibilities in areas such as logistics, disaster relief, and mobility. In Switzerland and around the world, the drone industry is growing with innovative technologies that have the potential to revolutionize both defense and civilian applications. But how can the full potential of these technologies be harnessed?

In particular, collaboration between the Swiss government, especially the DDPS, and the growing drone industry offers opportunities for strategic advancement. The question is no longer whether drones will play a key role but how their integration into existing security and defense concepts can be optimally designed. At the same time, clear legal frameworks are needed to promote innovation while preventing misuse.

These and other questions will be discussed with our expert:

- How can modern drone technologies contribute to security and efficiency in both military and civilian sectors?
- What role can the Swiss drone industry play in international competition?
- How can collaboration between the federal government, the DDPS, and the industry be improved to promote targeted innovation?
- What regulations are needed to ensure the responsible use of drones?

We invite you to discuss this important and highly topical subject with experts at the 21st SSF Security Talk.

We look forward to your participation!

Yours sincerely,

A blue ink signature of Hans-Jürg Käser, consisting of a stylized, elongated 'H' followed by a series of loops and a final upward stroke.

Hans-Jürg Käser

President

SWISS SECURITY FORUM (SSF)

A red ink signature of Fredy Müller, featuring a bold, blocky 'F' followed by a series of connected, slightly wavy lines.

Fredy Müller

Managing Director
